S14 acoustic canopy

OWA's acoustic canopies are versatile, one-piece, premium quality, floating, metal ceiling elements. They are easy to install or relocate and the popular 2m x 1m canopies are available ex-stock in the UK in standard colours black or white. These free-hanging canopies help to create stunning open soffit interior spaces where sound absorption is required. Ideal for offices, lobbies, restaurants, canteens, shops, museums, galleries, schools and colleges.

OWA

S14 acoustic canopy

- An S14 acoustic canopy is comparable in price to a glass wool absorber.
- S14 offers greater durability and style. It's easily cleaned, longer lasting, stain resistant.
- Each metal canopy is made from low carbon steel, utilising cleaner, electric arc furnace technology, keeping embodied carbon to a minimum.
- OWA UK stocks a number of Rd1522 perforated 2 m x 1 m S14 canopies in white (RAL 9016) and black (RAL 9005).
 - White canopies are ideal for noisy environments requiring light and brightness, i.e. open plan offices.
 - Black canopies are particularly suited to darker, contemporary spaces where noise affects an experience, i.e. retail, bars and restaurants.
- They can be ordered via leading UK distributors as a complete kit, including black acoustic fleece, class A pad and M6 x 1000 mm threaded rods.
- As well as the standard S14 above, OWA offers bespoke sizes, shapes, colours, perforation patterns and mesh, all made to order.
- OWA UK also offers the standard stocked metal canopy for a sustainability 'take-back' scheme, enabling re-use and 100% recycled, 'post-consumer' material, a further giant stride towards the net zero goals of UK clients. No more wasteful Cat A practices.

Collection	OWAtecta
Material	Galvanised steel, 1.0 mm
Dimensions*	2000 x 1000 mm (from stock, incl. M6 rods)
Surface*	Perforated Rd1522 with a black acoustic fleece
